SUMMARY OF QUALIFICATIONS

- Accomplished Computer Science student with hands-on experience with software development and automation in a professional setting.
- Proficient in building and automating testing pipelines, with expertise in Playwright, GitHub Actions, and Continuous Integration (CI) to improve software quality and streamline deployments.
- Strong skills in Java, Python, C++, SQL, and front-end technologies, with practical experience in full-stack development across various software engineering projects.
- Proven ability to take initiative and adapt in fast-paced environments, delivering high-quality, scalable solutions in both automated testing frameworks and full-stack applications under tight deadlines.

EXPERIENCE

Software Engineer (Intern)

Golf 918 Systems

Remote

Sep 2024 - Present

- * Working on a continuous integration (CI) pipeline, improving testing efficiency and reducing manual intervention.
- * Created, monitored, and maintained Playwright test scripts, identifying and resolving errors and timeouts to ensure smooth testing.
- * Implemented testing automation using GitHub Actions, reducing manual testing time and ensuring consistent test execution across environments..

TECHNICAL SKILLS

Programming Languages: Java, Python, C/C++, JavaScript/TypeScript, SQL, HTML/CSS, PHP, R.

Frameworks, Methods and Libraries: React JS, Node.js, Tailwind, Playwright, Qt, Agile.

Developer Tools: Jira, Confluence, Git/BitBucket, GitHub Actions, Postman, MySQL, L^AT_EX.

EDUCATION

Major in Computer Science

University of Western Ontario

London, Ontario

2021 - 2025

- * Engaged member of Western Developer's Society (WDS) and Google Developer Student Club, participating in tech workshops, hackathons, and collaborative projects.

PERSONAL PROJECTS

Personal Website | React JS, Node.js & SCSS

July 2024

- * Implemented responsive design techniques to ensure optimal user experience across various devices and screen sizes.
- * Deployed on a [custom domain](#) using Github and Netlify, ensuring seamless rebuilding with the latest commits.

To-Do List Chrome Extension | JavaScript, HTML5 & CSS

July 2024

- * Utilized local storage for persistent data retention, allowing users to save tasks and notes.
- * Added customizable themes to enhance user satisfaction and accessibility.

Automatic Instagram Unfollower | Python

June 2024

- * Coded an automated Python script to manage Instagram connections by identifying and unfollowing non-reciprocal followers, utilizes libraries such as ensta and ffmpeg.
- * Included error handling and logging features to track script performance and issues.

TA Management System | SQL

February 2024

- * Built a relational database using MySQL and deployed on a virtual machine.
- * Developed complex SQL queries to generate detailed reports on TA assignments, availability, and workload distribution.
